

WeldTec®

Where Quality and Innovation Never Ends

Clear Quartz Nozzle Kits

Clear quartz glass TIG nozzles for WeldTec® and most standard torches.

Not just glass... but Fused Quartz glass!

- 3 times the temperature resistance of Pyrex® glass
- Zero heat shock breakage due to temperature changes
- Tougher than Pyrex® for better durability
- Does not out gas impurities like Pyrex®
- Does not discolor turning yellow/brown like Pyrex®

TEC introduced the glass nozzles to TIG torches back in 1955.

These modern fused quartz nozzles offer superior temperature and thermal shock resistance, surpassing Pyrex®, lava and the pink ceramic nozzles for performance.

You can use these quartz nozzles on most industry standard TIG torches using a simple adapter ring. Available in several orifice sizes and several lengths to suit your job requirements.
